

FEDERAL INSTITUTE OF PIAUÍ

INSTITUTO FEDERAL DE
EDUCAÇÃO, CIÊNCIA E TECNOLOGIA
PIAUI

THE INSTITUTION

For more than a hundred years the Federal Institute of Piauí (IFPI) is a benchmark of excellence for education in the State of Piauí. Based on a single and current model of education that fits the reality of the individual psycho-pedagogical training and the new demands of the labor market, IFPI offers a continuing education, integrating the basic, technical and technological/higher education in only one academic environment.

In view of continuing education, the Institute also encourages research, innovation and post-graduation, offering scholarships for undergraduate research to its students and qualifying its faculty through specialization, masters and doctorates. Thus, it stimulates the development of technical and technological solutions, extending its benefits to the community of Piauí.

Currently, IFPI has 11 campuses structured in 10 cities of the state. In 2013, three more units will be opened and three more are in the bidding process.

IFPI offers technical integrated courses, technical concomitant/subsequent courses, technology courses, licentiate degrees, one bachelor's degree and one master's degree.
